UPDATED NOVEMBER 2014

Jackson Park

In this regional park's central woodland is the main hiking trail, where in spring, visitors can see a display of native wildflowers. Also traversing the park is the quiet, wooded North Trail, along the Kinnickinnic River. A paved trail around the lagoon offers opportunities to view waterfowl and large wading birds. Black-crown night herons have been observed nesting on one of the islands. Please submit your observations at eBird.org.
